

Arnside Tennis Club

Arnside Tennis Club would like to seek the approval of the Parish Council to dig a number of exploratory holes around the clubhouse to ascertain whether the land would permit the siting of either a septic or holding tank, or pipework to link to the mains water supply and sewer system. The number of holes would be determined by what is found at each point. It is envisaged the holes would be 30-45 cm wide; the depth would be determined by what is found below ground. The holes would be immediately refilled, and the turf restored to as close to the original state as possible.

Many thanks

Terry Wareham
