Retrofit Made Easy

Retrofitting your home with insulation, draught-proofing and upgraded ventilation and heating systems can make it healthier, warmer and cheaper to heat. You'll be doing your bit for the planet, too.

Come along to the events to hear how you can get a free thermal imaging survey of your home and how CAfS can help you with independent, professional advice and support. You'll also hear from neighbours who have already refurbished their homes. Bring any questions you have for our experts to answer!

Find out about other home energy support from CAfS, including Solar Made Easy and Cold to Cosy Homes, plus information about grants and funded programmes.

This project is funded through the Energy Industry Voluntary Redress Scheme.
